Response to Amendment

1. Applicant's most recent amendment to the claims (amendment G, paper No. 20) was made in accordance with 37 CFR 1.121, rather than in accordance with 37 CFR 1.173. A complete copy of all amended claims, made in accordance with 37 CFR 1.173 and NOT 37 CFR 1.121 should be submitted.

Oath/Declaration

2. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

The declaration submitted with the filing of the Reissue Application does not cover the material added in later amendments to the claims or new claims after the time of filing of the application and the original Declaration. See 37 CFR 1.175(b)(1).

3. In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 8-12 are rejected as being based upon a defective Declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."

Recapture

4. Claims 10, 11 and 12 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Claims 10, 11 and 12 do not include the limitation of an ejection mechanism to eject the pin from the channel, as recited in independent claims 1 and 7 of the patent. Furthermore, in the amendment filed in the parent application on 21 December 1995 (paper No. 8), at pages 7 and 8, applicant explicitly refers to the ejection of the pin from the channel, and the provision of an ejection mechanism in the grip as being critical, further arguing that the references to Street and Ingals fail to teach this critical limitation. Therefore, all added reissue claims must include such language.
